

ADITYA VERMA

Ghaziabad, U.P.

☎ Phone: 7394822003 ✉ adityavermabe@gmail.com  [Linkedin](#)  [Github](#) [LeetCode](#)

Role - Software Engineer (Full Stack & GenAI).

PROFESSIONAL SUMMARY

Computer Science & Engineering undergraduate with practical experience in Full Stack Development, Machine Learning, NLP, and Generative AI. Experienced in building classification models, LLM-powered chatbots, and full-stack MVC applications. Proficient in Python, JavaScript, React.js, Node.js, and MongoDB. Passionate about delivering scalable AI and software engineering solutions.

EDUCATION

Dr. A.P.J Abdul Kalam Technical University Lucknow

June 2026

B.Tech(CSE) - **CGPA - 8.5**

Government Polytechnic Bareilly

July 2022

Diploma in Engineering - **Percentage: 80%**

INTERNSHIP

The Cosmic Stack, Sector 137, Noida.

1st July 2025 - 31st August 2025

Software Development Intern - 

- Hands-on experience in Full Stack Development in JavaScript, including ReactJS, NodeJS, and APIs.
- Architected a scalable MVC application using ReactJS, resulting in a 20% reduction in server load.

RELEVANT COURSEWORK

- Data Structure
- Machine Learning
- Computer Networks
- Algorithm
- Operating Systems
- DBMS

PROJECTS

Fake News Classifier -  | [NLP, Machine Learning, scikit-learn, TfidfVectorizer, Stemming](#)

- * **Developed a Fake News Classifier** achieving 92% accuracy on Kaggle dataset using TF-IDF and Logistic Regression.
- * **Data Set**- Kaggle Fake-news dataset which includes: train.csv (label: 1 = unreliable, 0 = reliable), test.csv, and submit.csv.
- * **Stemming** during text preprocessing to improve feature normalization, sentiment analysis, and domain analysis.
- * **TfidfVectorizer** Used TfidfVectorizer from scikit-learn to convert text into TF-IDF features for model training.

Document Summarizer RAG -  | [GenAI, RAG, LangChain, HuggingFaceEmbeddings, ChromaDB](#)

- * **RAG** Retrieval-Augmented Generation is the process of optimizing the output of a large language model. Built a RAG system that accepts any PDF document and generates summarized answers to user queries.
- * **Implementing the LangChain** framework for smooth flow of working.
- * Added **HuggingFaceEmbeddings** for converting the text into vectors.
- * **ChromaDB** was used to store and retrieve text vector embeddings efficiently.

Q-A ChatBot -  | [GenAI, OLLAMA, LangChain](#)

- * **Implementing a ChatBot** that works locally (offline) and gives personalized responses.
- * **LLM Models** such as Mistral, LLaMA 3.2, and Gemma 2.2B for efficient responses.
- * **Ollama** is an open-source tool that lets you run large language models (LLMs) locally on your computer.
- * **LangChain** was used for building the LLM chatbot, while **LangSmith** was used for tracking token usage and tracing the flow.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL.

Technologies/Frameworks: Machine Learning, NLP, LangChain, HTML5, React.js, Node.js, TailWind.CSS, MongoDB, MySQL, CI/CD, Docker, AWS / Azure, Git and Github.

Developer Tools: VS Code, PyCharm, Jupyter Notebook.

CODING PLATFORMS
